

Cribb PH

Project Specification

1. Project Overview

Project Name:
Cribb PH

Tagline / One-Liner:
Find the place that fits your life.

Short Description:

Cribb PH is a property-finding platform designed for renters in the Philippines who want a smoother, more transparent way to discover apartments and condos that actually match their lifestyle needs. It solves the frustrations of scattered listings, unclear landlord details, and the lack of filters like pet-friendly units, accessibility features, proximity to transportation, and community preferences.

Long-Term Vision:

Cribb PH aims to evolve into a full-suite housing platform: mobile apps, AI-powered matching, virtual viewings, digital lease management, and integration with local real estate partners. Over time, it should become the go-to database for residential rentals nationwide.

Motivation / Background:

In the Philippines, there's no centralized, renter-first platform offering lifestyle-based search filters. Listings are spread across Facebook groups, unverified marketplace posts, and outdated websites. The gap leaves renters guessing and wasting time. Cribb PH intends to fix that by offering clarity, structure, and a more trustworthy experience.

2. Objectives & Scope

Primary Goals (Must-Haves):

- Search engine for apartments/condos with lifestyle-centric filters
- Verified listings with clear details (amenities, rules, pricing, location)
- User accounts (renters + property owners)
- Messaging or inquiry system
- Location-based search

- Basic dashboard for landlords to post and manage listings

Secondary Goals (Nice-to-Haves):

- AI-assisted recommendation system
- Map-based browsing
- Saved searches & notifications
- Photo galleries and video walk-through support
- Tenant reviews & rating system
- Accessibility filters (wheelchair access, elevators, etc.)

Out-of-Scope (For Now):

- Digital lease signing
 - Payment gateways for rent
 - Landlord background verification
 - Mobile app (planned for expansion stage)
-

3. Target Audience & Use Cases

User Personas

1. **Young Professional Maya (Age 23)**
Wants a safe condo near her office, must be pet-friendly for her cat.
2. **University Student Leo (Age 19)**
Needs an affordable dorm-style unit near the university and public transport.
3. **OFW Returning Home (Age 35)**
Looking for a long-term family-friendly apartment in NCR with verified landlords.
4. **Small Landlord Mr. Cruz (Age 52)**
Wants exposure for his units without relying on unreliable Facebook groups.

User Stories

- *As a renter, I want to filter listings by pet policy so I can bring my pets without stress.*
- *As a landlord, I want to post a unit easily so I can attract potential tenants faster.*

- *As a student, I want to see units close to my university so I don't spend hours commuting.*
- *As a renter, I want verified details so I can avoid scams.*

Key User Flows

Renter browsing flow:

1. Open home page
2. Enter location → apply filters → browse results
3. Click listing → view photos, details, amenities
4. Send an inquiry or save the listing

Landlord posting flow:

1. Log in
2. Add property → upload photos → fill out details
3. Publish listing
4. Manage inquiries and edit property details
